DATA · TECHNOLOGY · HUMAN DYNAMICS

Understanding systems. Connecting people. Moving things forward.

PROFESSIONAL PROFILE

I've spent years making things happen through people. I started in the events industry, where understanding people, communication and moving parts was simply part of getting things done. At AUTO1 Group, I brought that instinct into Data, Marketing Intelligence and Frontend, aligning analysts, engineers, marketers and stakeholders across Autohero, WKDA and AUTO1. Training in Data Analytics at Ironhack, advanced training in systemic perspectives, and reaching professional proficiency in German have expanded how I work across three dimensions: technical fluency, human dynamics, and contextual understanding.

Top skills: Tech Project Management · Delivery & Stakeholder Management · Scrum/Agile · Data Analytics · Machine Learning · Systemic Approach for Teams and Organizations

RECENT DATA & MACHINE LEARNING PROJECTS

SUMMER 2026

Northern Lights Predictor	Aurora Forecast Streamlit app: Machine Learning plus real-time and forecast APIs to estimate geomagnetic conditions and Northern Lights viewing chance. Data Analytics extension: Aurora App Activity Tracker — anonymous search logging and a Search activity dashboard (Neon PostgreSQL).
Shooting Stars Bot	Python app using weather APIs and astronomy calculations to identify optimal meteor-viewing windows and provide AI guidance.
CME Prediction Model	Classification of geoeffective CMEs using SMOTE, feature engineering, tuning, and precision/recall/F1 evaluation on NASA data.

RECENT ACHIEVEMENTS

Data Analytics Bootcamp · Ironhack · Aug 2026

German B2 TELC Certificate | Hartnackschule Berlin | February 2026

Advanced Training in Systemic Perspectives — Individuals & Organizations · Oct 2025 – Oct 2026

PROFESSIONAL EXPERIENCE

Project Manager, Marketing Intelligence · AUTO1 Group, Berlin

NOV 2022 – DEC 2024

- Managed intake, prioritization, and delivery of data and marketing intelligence initiatives for Autohero, WKDA, and AUTO1 across B2B and B2C environments.
- Reduced the active request pipeline from 50+ items to approximately 30 (around 40%) by challenging scope, clarifying urgency, and continuously re-prioritizing stakeholders and resources.
- Balanced workloads and monitored delivery across analysts and data engineers, strengthening team performance during high-pressure and low-capacity periods.
- Facilitated planning, estimation, stand-ups, retrospectives, deadlines, and cross-team communication; coordinated early machine learning initiatives from business requirements through delivery.

Project Manager, Marketing Tech · AUTO1 Group, Berlin

AUG 2021 – NOV 2022

- Managed delivery across 22 people in Frontend and Marketing Intelligence teams and three parallel ticket pipelines.
- Coordinated developers, QA, CRO, data engineers, analysts and marketing, HR, legal and business stakeholders across Europe — turning requests into priorities, plans, reporting and escalation paths.
- Created a Tableau documentation system for reports, workbooks, data sources, refresh schedules, and ownership.

Event Project Manager · Loure, Amsterdam

MAY 2019 – JUL 2021

- Co-created Loure — a luxurious brand for corporate venues in Amsterdam — shaping identity, vision and values, launching the website, and writing the content that gave it a voice.
- Scouted out-of-the-ordinary venues across Europe and stepped into distinguished rooms: tailor-made evenings at Opera Prague Palace, signature cocktails at The Savoy, London, among many others all around Europe.
- Grew Loure through B2B partnerships, CRM and branded content, and organised travel so site visits and events felt seamless.

FURTHER EDUCATION & TRAINING

Master in Event Management, Protocol & I.R. · Universidad Miguel Hernández · 2017 – 2018

Bachelor's in Advertising & Public Relations · Universidad de Alicante · 2012 – 2016

Marketing & Communications · University of Limerick, Ireland · 2015

Additional: PMP (2024) · Data Management (2023) · Scrum Master Certificate and SQL W3Schools (2022)

TOOLS & LANGUAGES

Data & AI: Python, SQL, pandas, NumPy, scikit-learn, Machine Learning, statistics, data reporting, Tableau, matplotlib, seaborn, ETL, dbt, Airflow, Airbyte, Cursor, Prompt Engineering, AI-Assisted Development

Delivery: Tech project management, stakeholder management, cross-team facilitation, Jira, Asana, GitHub, AWS, Agile, Scrum, team building, workload balance

Product & Tech: APIs, Streamlit, frontend, backend, funnels, testing, rollouts, GTM

Languages: Spanish (native), English (C1/fluent), German (B2 TELC), Dutch (basic, passive), Catalan (intermediate, passive)
