DATA · TECHNOLOGY · HUMAN DYNAMICS

Understanding systems. Connecting people. Moving things forward.

PROFESSIONAL PROFILE

Before technical systems, I learned to navigate human ones—leading international events where priorities shifted in real time and people still had to move in one direction. At AUTO1 Group, I brought that instinct into Data, Marketing Intelligence and Frontend, aligning analysts, engineers, marketers and stakeholders across Autohero, WKDA and AUTO1. Training in Data Analytics at Ironhack, advanced Systemic Therapy studies, and reaching professional proficiency in German have expanded how I work across three dimensions: technical fluency, human dynamics, and contextual understanding.

Top skills: Python · SQL · Machine Learning · Data Visualization · APIs · Statistics · Streamlit · Systemic Approach

PROFESSIONAL EXPERIENCE

Project Manager, Marketing Intelligence · AUTO1 Group, Berlin NOV 2022 – DEC 2024

- Managed intake, prioritization, and delivery of data and marketing intelligence initiatives for Autohero, WKDA, and AUTO1 across B2B and B2C environments.
- Reduced the active request pipeline from 50+ items to approximately 30 (around 40%) by challenging scope, clarifying urgency, and continuously re-prioritizing stakeholders and resources.
- Balanced workloads and monitored delivery across analysts and data engineers, strengthening team performance during high-pressure and low-capacity periods.
- Facilitated planning, estimation, stand-ups, retrospectives, deadlines, and cross-team communication; coordinated early machine learning initiatives from business requirements through delivery.

Project Manager, Marketing Tech · AUTO1 Group, Berlin AUG 2021 – NOV 2022

- Managed delivery across 22 people in Frontend and Marketing Intelligence teams and three parallel ticket pipelines.
- Coordinated developers, QA, CRO managers, data engineers, analysts, HR, management, and business stakeholders across Europe; translated requests into structured priorities, plans, reporting, and escalation paths.
- Created a Tableau documentation system for reports, workbooks, data sources, refresh schedules, and ownership.

Event Project Manager · Loure, Amsterdam MAY 2019 – JUL 2021

- Co-created Loure's brand identity, vision, values and website; developed branded content for web and social channels.
- Drove B2B growth through CRM-supported partner relationships and strategic event-venue partnerships across Europe.
- Planned corporate events to objectives and budgets while leading European venue scouting, site inspections and travel coordination.

SELECTED DATA & MACHINE LEARNING PROJECTS

AI Northern Lights Forecast	Streamlit forecast app combining real-time solar, geomagnetic, atmospheric, darkness, and location data with a Dst Index ML model.
Shooting Stars Bot	Python app using weather APIs and astronomy calculations to identify optimal meteor-viewing windows and provide AI guidance.
CME Prediction Model	Classification of geoeffective CMEs using SMOTE, feature engineering, tuning, and precision/recall/F1 evaluation on NASA data.

EDUCATION & TRAINING

Data Analytics Bootcamp · Ironhack · 2026
Advanced Training in Systemic Therapy · Online · Oct 2025 – Oct 2026
Master in Event Management, Protocol & I.R. · Universidad Miguel Hernández · 2017 – 2018
Bachelor's, Advertising & Public Relations · Universidad de Alicante · 2012 – 2016
Marketing & Communications · University of Limerick · 2015
Additional: PMP (2024) · Data Management (2023) · Scrum Master and SQL (2022)

TOOLS & LANGUAGES

Data & AI: Python, SQL, pandas, NumPy, scikit-learn, statistics, APIs, ETL, dbt, Airflow, Airbyte, Cursor, Prompt Engineering, AI-Assisted Development
Delivery: Project and stakeholder management, cross-team facilitation, Jira, Asana, GitHub, AWS, Agile, Scrum, team building, workload balance, data reporting
Product & Visualization: Tableau, Streamlit, matplotlib, seaborn, frontend, backend, funnels, testing, rollouts, GTM
Languages: Spanish (native), English (C1/fluent), German (B2 TELC)
